Ogulcan Bozkurt — Front End Developer
📍 Izmir, Turkey   💻 Gyunbie on Github   📞 +905070129966   ✉ ogulcan.bozkurt0@gmail.com

🪪 Profile

Perfectionist and detail-oriented front end developer with superb work ethic seeking an entry-level position. Passionate about design and translating designs to front end code. Capable of motivating self and others. Adept at grasping new concepts quickly.

🎓 Education

Computer Engineering, *Ege University*
2018 – present

🌐 Languages

Turkish, **English** *(Proficient)*, **German** *(Intermediate)*

🧠 Skills

React, JavaScript, Next.js, Redux, HTML, CSS/Sass, Version Control, TailwindCSS, Bootstrap, Unix/Bash

💼 Professional Experience

Front End Developer, *Freelance*   2021 November – present
Sample Tracking System
Currently in the progress of developing a sample tracking system for a clothing company. Involves web and mobile applications.

Front End Developer Intern, *Techtile Inc.* 🔗   2021 August – 2021 November
Social Media Automation System
Created the project from scratch with Bootstrap and designed multiple pages responsively. Implemented sign-in functionality with Redux and JWT. Implemented Instagram API login and tag search system. Implemented a scheduling system that notifies the users based on their post schedule.
At Home GYM Application
Was assigned to reformat and restructure the dirty code, which was done under a senior provision. Designed dashboard and sign-in pages responsively. Fixed rendering issues between page changes. Implemented drag and drop calendar for event creation. Added English support.
