PROFESSIONAL EXPERIENCE

Front End Developer, Freelance

Nov 2021 – Present

Sample Tracking System - *React, Next.js*   Live Version 🖥️ | Source Code
• Currently in the progress of developing a sample tracking system for a fabric company.
• Involves web and mobile applications.

Front End Developer Intern, Techtile Inc. 🔗

Aug 2021 – Nov 2021

Social Media Automation System - *React*
• Created the project from scratch with Bootstrap and designed multiple pages responsively.
• Implemented sign-in functionality with Redux and JWT.
• Implemented Instagram API login and tag search system.
• Implemented a scheduling system that notifies the users based on their post schedule.

At Home GYM Application - *React*
• Reformatted the code down to ~70% of its original size under a senior provision.
• Designed and edited multiple pages to be responsive.
• Fixed rendering issues between page changes.
• Implemented drag and drop calendar for event creation.
• Implemented language support and added English language.

PROJECTS

Cryptocurrency Tracker, *Cryptocurrency price listing application*   Live Version 🖥️ | Source Code
• Built with React and TailwindCSS.
• It uses CoinGecko API to retrieve up-to-date coin prices, and CryptoNews API to retrieve news.

dApp Authentication, *Simple dApp sign in with MetaMask*   Live Version 🖥️ | Source Code
• Built with Web3, React and TailwindCSS.
• It uses MetaMask extension to sign in and show information.

Instagram Clone, *Basic clone of the social media application Instagram*   Live Version 🖥️ | Source Code
• Built with React, Next.js, TailwindCSS, Firebase v9, and Recoil.
• It uses NextAuth and Firebase to sign in, Faker to create fake data, Firestore to store users, images, likes, and comments, TailwindUI to create a post modal, and Recoil to store the modal state globally.

Airbnb Clone, *Basic clone of the renting application Airbnb*   Live Version 🖥️ | Source Code
• Built with React, Next.js, and TailwindCSS.
• It uses DatePicker to select the date ranges, ReactProgressBar to indicate loading between pages, and Mapbox to show locations on a map in the search page.
